Anadarko’s Values and Strategy

**Values**
- Integrity and Trust
- Servant Leadership
- People and Passion
- Commercial Focus
- Open Communication

**Strategy**
- Explore, Develop and Commercialize resources on a global level
- Ensure Excellence in Health, Safety and Environment
- Focus on Financial Discipline, Flexibility and Creative Value
- Demonstrate our Values in all we do
Committed to Safety and the Environment

When undertaking a new project we:

- Understand the environmental problems and cultural particularities of the area where we work, safeguarding the environment and the communities.

- Conduct business activities to minimize environmental impact.

- Adhere to strict alignment with our company policies, practices and procedures and the regulations of the countries where we operate.

The culture of “Safety First” is a way of life at Anadarko

- At Anadarko the only job worth doing is a safe job!
Respecting Local Cultures & Peoples

- Uinta Basin, Utah: 38% of assets are on tribal lands; engage regularly with area leaders and support oil and natural gas training programs at local universities.

- New Zealand: Collaborated extensively with Maori in regards to responsible operations, HSE programs and culture of accountability.

- Mozambique: Working with government to conduct Resettlement Action Plan; develop a Human Rights Impact Assessment to ensure LNG development benefits the nation and its people.
Crisis & Emergency Management

Emergency Response Organizational Structure

**Emergency Response Team (ERT):** Consists of first responders located at the facility and those emergency contractors (medical, oil spill response, well control, etc.) who arrive shortly after an event. The number of positions/personnel required to staff the ERT is determined by the scale and complexity of the event.

**Incident Management Team (IMT):** Provides response operations outside the capabilities of the ERT. The Incident Commander will determine the need for activation and mobilization of the IMT. The members of the ERT will typically become members of the IMT.

**Incident Support Team (IST):** Oversees all actions that need to take place away from the scene and are not available locally, to support the IMT, facilitate planning and provide additional media and Human Resources coordination and additional support to address the concerns of the Company, the public and government agencies.

**Crisis Management Team (CMT):** Manages crisis-related issues at the Anadarko Executive level. The CMT provides guidance on issues that have the potential to significantly impact the Company’s reputation or operations or pose a significant legal, regulatory or financial liability.
Containment & Rapid Response

Central to its commitment to operate in a safe and environmentally sound manner, Anadarko participates in several industry response and containment initiatives, including:

**Oil Spill Response Limited:** Oil Spill Response Limited (OSRL), which Anadarko is a founding member, is the largest international industry-funded cooperative which exists to respond to oil spills wherever in the world they may occur, by providing preparedness, response and intervention services. OSRL maintains response resources at pre-staged locations around the world.

**Wild Well Control (WWC):** Is a private company that serves as Anadarko’s primary rapid response service provider. WWC provides 24/7 emergency response service with specialized firefighting, well control and subsea containment equipment to all areas of operation. WWC has well-established roots along with multiple assets in all areas of Anadarko’s operations.
External Engagements

Anadarko is committed to being a valuable partner in advancing Oil Spill Response Preparedness.
